

A Perspective On Homosexuality

Over the last decade there has been a flurry of social and political activities on homosexuality in a lot of western countries. As long as homosexuality was the internal matter of all sovereign countries of the world, the rest, including Africa, could only look on unconcerned. However, in 2011 at the Commonwealth Conference at Perth, Australia, the British Prime Minister, David Cameron said any country that wishes to go on enjoying British aid must legalise homosexuality. That made homosexuality a new, critical integral part of British foreign policy and international relations. Since there are countries that hitherto accessed and will continue to access British aid, but whose general citizens have belief systems that abhor homosexuality, that new British policy has become an international problem with many contemporary ramifications. Yet that is not the end of the matter, for two more tactical events inherent with the global implications have happened deepening the problem. The first is the fact that very sick popes are allowed to die as pontiffs, but Pope Benedict XVI, who strictly upheld Catholic doctrine and was quietly punishing child-abusive priests, became haunted with series of scandals and then resigned on fabulous grounds of ill-health. The second event is that his resignation opened the door to the election of a pontiff who has publicly articulated his love for homosexuality. Put all three together and a larger, dangerous clandestine model created by western governments emerges. This book, *A PERSPECTIVE ON HOMOSEXUALITY*, is full comprehensive assessment of all the principal issues raised by the way western countries are preparing to use homosexuality in global political-economy and the consequent political and socio-religious implications.
