Beginning ASP.NET 1.0 with Visual Basic.NET (Programmer to Programmer)
What is this book about?ASP.NET 1.0 is the final release of Microsofts Active Server Pages (ASP). It is a powerful server-based technology designed to create dynamic, interactive, HTML pages for web sites and corporate intranets. ASP.NET is a core element of Microsofts exciting .NET vision, building on the strengths of the .NET Framework to provide many new features not seen in previous versions of ASP.This book, entirely revised and updated for the final release, will provide you with a step-by-step introduction to ASP.NET using VB.NET, with plenty of worked examples to help you to gain a deep understanding of what ASP.NET is all about, and how you can harness it to build powerful web applications.What does this book cover?In this book, you will learn how toCreate basic ASP.NET pages with VB .NETUnderstand the concepts of Object Oriented ProgrammingWork with data and XMLDebug and handling errors in your codeUse ASP.NET Server ControlsCreate user controls and componentsExplore the world of Web servicesOptimize performanceSecure your applicationWho is this book for?This book is aimed at relatively inexperienced web builders who are looking to enrich their sites with dynamically-generated content, and want to learn how to start building web applications using ASP.NET. Developers who have a little experience with previous versions of ASP (and are looking to move over to ASP.NET), may also find this book helpful in getting a simple grasp on what ASP.NET is, what it does, and how it can be used. Experience of basic HTML is required, but previous experience of ASP or VBScript is not essential. Well be teaching the basics of VB .NET in this book, so prior experience of the language is not required.
