

# Training for Development (Kumarian Press library of management for development)

This is the Third Edition of Rolf P. Lynton and Udai Pareek's bestselling book, *Training for Development*. Completely revised, this new edition reflects the speed of change that the world has undergone in the last two decades and includes recent examples and illustrations. Since 1967, *Training for Development* has been regarded as the most comprehensive work available to professionals in the field of training and development. The authors focus on training not primarily as a source of new information, but rather as a means for changing behavior for lasting improvement on the job.
