

## Crossing Borders: Re-mapping Womens Movements at the Turn of the 21st Century (University of Southern Denmark Studies in History and Social Sciences)

This anthology indicates the many and multi-layered ways in which womens movements have developed in the past and the challenges that face womens movements today. Covering a broad range of issues, the book strives for re-narration and re-location of one of the major social movements of the 20th century and for fresh analysis of the latest trends. The framework for the texts has been set by recent structural, ideological and cultural changes towards globalization (including the end of the Cold War bipolarization), immigration, and multiculturalism. The changes have produced new fields of cooperation and conflicts within the womens movements and generated new questions that are dealt with in four main sections. - Choice Outstanding Academic Title 2005
