

# Curbing Population Growth: An Insiders Perspective on the Population Movement (The Springer Series on Demographic Methods and Population Analysis)

Oscar Harkavy offers a unique insiders view of the fascinating world of population politics. Chapters trace the growth of the movement as well as the various foundations, governments, and intergovernmental organizations which were an integral part of it from its beginning in the 1950s, through its growth during the 60s and 70s, to the present. Topics include the role of social science in understanding the causes and effects of population growth; reproductive research and contraceptive development; and the politics of family planning, sex education, and abortion in the United States.
