

E-learning 101: Its not as tough as it looks

E-learning 101 is the friendliest online learning guide on the planet! Unlike other online study guides, E-learning 101 makes solving e-learning problems fun. Smiling dogs appear on most pages, helping the online learner to smile, relax, and engage with simple and accessible e-learning strategies. The book presents 6 short lessons. Each lesson defines a common e-learning problem, and then walks readers through a series of steps to solve it. Interactive worksheets are included with every lesson, empowering readers to fix their e-learning problems right then and there. The lessons are short, but cover the biggest e-learning issues: * E-learning technology * Finding more time to study * Self-motivation * Procrastination cures * How to submit assignments on time, and * Avoiding loneliness when learning online. This online study guide inspires new online learners to face e-learning with confidence, replacing feelings of anxiety with action and achievement.
