# Enhancing Online Learning Experience: Through a RIA Based Learning Application

The main purpose of this study is to develop a collaborative base and co-operative online painting system that could be used as a part of an E-Learning platform based on web 2.0 standards, that is about to engage the rich internet applications (RIA) techniques to enhance distance learning experiences. This application integrates the online real-time interaction to improve the presentation of the routine E-learning and inspire self-active learning willing. This application is about to give a chance of using all the internet fruits and bounties to make sure that an instructor and a learner who is collaborating with his or her colleagues are able to pass their knowledge, toughs and ideas. This way and by using this rich internet application (RIA) is so far distinctly ahead of its other competitive methods and tools. The method which is used in this project is having two series of codes with separated functionalities. In this book, our contributors are, Meisam Moradi , Dr.Sabzali Musa Kahn, Jaffri Hanafi and Zahra Kakaei.
