

A Guide to the Birds of India, Pakistan, Nepal, Bangladesh, Bhutan, Sri Lanka, and the Maldives

Birdwatchers have long waited for a comprehensive and up-to-date identification guide for the Indian subcontinent. This exhaustively researched and beautifully produced book will finally meet that need. Written by three leading experts on the region--Richard Grimmett, Carol Inskipp, and Tim Inskipp--the book provides complete information about the 1,300 species of birds found in India, Pakistan, Nepal, Bangladesh, Bhutan, Sri Lanka, and the Maldives. The guide is firmly rooted in the authors extensive field experience, reflected in the accuracy and fullness of their bird descriptions. The guide features more than 150 color plates by eminent bird illustrators from Europe and India that depict all the species in the region, ranging from the Himalayan Snowcock in the north to the Sri Lanka Spurfowl in the south. The plates include all relevant identifiable subspecies, as well as ages and sexes. The text consists of a detailed identification section, discussing the differences between similar species and containing descriptions of vocalizations, habits, habitat, breeding, distribution, and status. There are distributional maps for nearly all species. And the authors introduction provides useful background information about such subjects as conservation, the history of ornithology on the subcontinent, and the climate. A detailed bibliography provides an introduction to the prolific literature on the subcontinent. This is a landmark publication that will be enthusiastically welcomed by all birdwatchers with an interest in the extraordinary variety of birds in this vast and diverse region.
