

East to West to East: Journey of a Us Trained Chinese Financier

Randolph Kwei's remarkable life traverses varied realms: three separate careers in computing, banking, and investing; a life lived on four continents; and the continual pursuit of personal growth. Randy's memoir revels in the delights of a curious mind, the rewards of a generous spirit, and the importance of maintaining a positive outlook in the face of life's inevitable challenges. The importance of family runs throughout, from Kwei's ancestral roots, to his formative years in wartime China, through his long and remarkable career, all the way to the rich professional lives of his children. Thanks to his meticulous diaries, we share the insights of a man living by his own Golden Rules, foremost among them: maintain a positive attitude, take responsibility for your thoughts and actions, be passionate about your chosen activities, and don't take yourself too seriously. Kwei shares his investment strategies and reveals how his diverse life experiences gave him invaluable insights into understanding - and often outsmarting - the stock market. The result is a 15-year track record of outperforming the Asian market, which has witnessed some of the most volatile periods in modern times. Weaving history and tales of financial markets into his life's story, this is an unforgettable adventure of one man who is riding the waves of change in the East as it closes its divide with the West.
