

India: Preparation for the World of Work: Education System and School to Work Transition

This book explores how the Indian education and training system prepares young people for the world of work and for the requirements of the employment market because India is a leading industrialised nation with a very young population and a high demand for a skilled workforce. Indian experts write from a course-specific perspective, offering a comprehensive picture of educational policy, curriculum design and cultural characteristics. The virtual absence of a formalised system of vocational training in India underlines the importance of this research.
