

# Intimations of Mortality: Time, Truth, and Finitude in Heidegger's Thinking of Being

Heidegger's thinking has an underlying unity, this book argues, and has cogency for seemingly diverse domains of modern culture: philosophy and religion, aesthetics and literary criticism, intellectual history and social theory. The theme of mortality finite human existence pervades Heidegger's thought, in the author's words, before, during, and after his magnum opus, *Being and Time*, published in 1927. This theme is manifested in Heidegger's work not as funereal melodramatics or as despair and destructive nihilism but rather as a thinking within anxiety. Four major subthemes in Heidegger's thinking are explored in the book's four parts: the fundamental ontology developed in *Being and Time*; the lighting and clearing of Being, understood as unconcealment; the history of philosophy with emphasis on Heraclitus, Hegel, and Nietzsche interpreted as the destiny of Being; and the poetics of Being, explicated as the fundamental experience of mortality. Neither an introduction nor a survey, this book is a close reading of a wide range of Heidegger's books, lectures, and articles—including extensive material not yet translated into English—informed by the author's conversations with Heidegger in 1974-76. Each of the four subthemes is treated critically. The aim of the book is to push its interrogations of Heidegger's thought as far as possible, in order to help the reader toward an independent assessment of his work and to encourage novel, radically conceived approaches to traditional philosophical problems.
