

Antipsychotic Drug Use Down 9.1% Among Long-Stay Nursing Home Residents (OPEN MINDS Weekly News Wire Book 2013)

On August 27, 2013, the federal Centers for Medicare & Medicaid Services (CMS) released data from Nursing Home Compare that indicates that the percentage of long-stay nursing home residents taking off-label antipsychotic medications has dropped by 9.1% between late 2011 and early 2013. In the last quarter of 2011, 23.87% of long-stay residents took an antipsychotic; this percentage dropped to 21.71% during the first quarter of 2013.
