

## National Standards and Best Practices for U.S. Museums

For the first time, the U.S. museum professions current operating standards in areas from public accountability to facilities and risk management are available in a single publication. This guide is an essential reference work for the museum community, presenting the ideals that should be upheld by every museum striving to maintain excellence in its operations. An introductory section explains how virtually anyone associated with museums will find the book valuable, from trustees to staff to funders and the media. It is followed by a full outline of the standards, including the overarching Characteristics of Excellence and the seven areas of performance they address. Throughout the book is commentary by Elizabeth E. Merritt, former director of AAMs Museum Advancement and Excellence Department and founding director of AAMs Center for the Future of Museums.
