

## The Logic of Gersonides: A Translation of Sefer ha-Heqqesh ha-Yashar (The Book of the Correct Syllogism) of Rabbi Levi ben Gershom with Introduction, ... New Synthese Historical Library) (Volume 40)

In the great libraries of Europe and the United States, hidden in fading manuscripts on forgotten shelves, lie the works of medieval Hebrew logic. From the end of the twelfth century through the Renaissance, Jews wrote and translated commentaries and original compositions in Aristotelian logic. One can say without exaggeration that wherever Jews studied philosophy - Spain, France, Northern Africa, Germany, Palestine - they began their studies with logic. Yet with few exceptions, the manuscripts that were catalogued in the last century have failed to arouse the interest of modern scholars. While the history of logic is now an established sub-discipline of the history of philosophy, the history of Hebrew logic is only in its infancy. The present work contains a translation and commentary of what is arguably the greatest work of Hebrew logic, the *Sefer ha-Heqqesh ha-Yashar* (The Book of the Correct Syllogism) of Levi ben Gershom (Gersonides; 1288-1344). Gersonides is well known today as a philosopher, astronomer, mathematician, and biblical exegete. But in the Middle Ages he was also famous for his prowess as a logician. The *Correct Syllogism* is his attempt to construct a theory of the syllogism that is free of what he considers to be the mistakes of Aristotle, as interpreted by the Moslem commentator Averroes. It is an absorbing, challenging work, first written by Gersonides when he was merely thirty-one years old, then significantly revised by him. The translation presented here is of the revised version.
