

Straight Finance Through Excel: Car Buying Vs. Leasing, House Buying & Investing

So what do you get when you look up Auto-Financing and Mortgage Calculators? A simple, quick process that tells you very little. Do Auto-Finance Calculators help you with negotiating at the dealership? NO. What happens at the dealership? The Salesperson shows you one number, the monthly payment. You're about to be screwed! The Section on Car Buying Vs. Leasing, simulates an experience at the dealership and takes into account their little tricks to separate you from as much cash as possible! Using my program and advice, you will neutralize the dealer tricks, become an experienced negotiator for your vehicle, and save money!

When you think of Mortgages, which loan is right for you? The traditional 30-Year? The 15-Year? An Arm Note? Perhaps an Interest-Only Loan? The Section on Buying a House takes into account your specific situation, walks you through with money saving strategies and advice, and will even compare your loan to others! OR, perhaps you're interested in Real Estate Investing! Section D covers all the aspects of Single Family Home Investing! The Excel Programs are provided to you, through my website. Its time to make money work, FOR YOU!
