

The Older Adult Psychotherapy Treatment Planner (PracticePlanners)

Saves you hours of painstaking paperwork, while providing optimum latitude in developing customized care and treatment plans for the unique needs of older patients. Following the same format as the bestselling *The Complete Psychotherapy Treatment Planner*, this invaluable sourcebook supplies all of the essential building blocks you need to create focused, formal treatment plans that satisfy all of the demands of HMOs, managed care companies, third-party payers, and state and federal review agencies. Organized around 27 main presenting problems, from dementia and depression to the psychological impact of physical decline, this book features: Thousands of well-crafted statements to choose from, describing goals and treatment options for cognitive, behavioral, and mood disorders detailed in the minimum data set required by HCFA. A sample plan that can be emulated in writing plans that meet all requirements of third-party payers and accrediting agencies. A presenting problem list that includes all relevant DSM-IV categories. A quick-reference format that allows you to locate treatment plan components by behavioral problem or DSM-IV diagnosis. Large workbook-style pages affording plenty of space to record your own customized goals, objectives, and interventions.
