

Case Studies in Information Technology Ethics (2nd Edition)

@ This collection of 42 high-quality, well-researched case studies on information and computer ethics addresses the most salient ethical issues of the information age, and illustrates the key concerns of computer specialists and information managers today. It engages readers who are novices in computer issues and those who are more involved in an exciting discovery process. The cases encompass areas such as privacy, free speech, intellectual property, Internet access, and policy discussions and feature the Microsoft trial, the Napster case, the FBI's Carnivore technology, and the AOL Time Warner merger. For managers, executives, and IT professionals who work in the field of computer technology, and for use in corporate management education programs.
